Experience

Full-Stack Software Engineer

Aug 2026 - Present

Stealth-Mode Startup, Full-Time

Toronto, ON (Hybrid)

- Founding engineer at an early-stage startup building a consumer hardware + software product from the ground up; further details available on request.

Lead AI Software Engineer

Feb 2026 - Aug 2026

Maxim Mechanical Group Inc., Full-Time Contract

Bradford, ON (Hybrid)

- Led design and development of a full-stack workforce, EHS, HR, and ops platform for a mechanical contractor from scratch: React 18/TypeScript SPA, Express/Prisma API, and Postgres (NeonDB) with RBAC across Owner, HR, Supervisor, and Labourer roles, self-hosting infrastructure to save \$30,000+ annually versus off-the-shelf/cloud alternatives.
- Designed and built “Frank,” a Claude-powered AI ops assistant with SSE-streamed tool-calling across jobs, safety incidents, HR, and compliance data, plus semantic search over cloud and on-prem document archives; used daily by 50+ employees with 99%+ uptime over 6 months in production (one incident in month one, zero since) while mentoring engineers on system design and code review.
- Built a DocuSign-style multi-party PDF signing workflow (draft → signatures → approval) and an automated Gmail → Azure Document Intelligence → Claude invoice-extraction pipeline for AP/AR, cutting manual review time by over 60%.

Founder & Principal Engineer

Dec 2025 - Present

VUNO Digital Solutions, Sole Proprietor

Toronto, ON

- Run an independent consultancy building full-stack web apps, internal dashboards, and AI automation tools for multiple concurrent clients; replaced a client's paper-based approval workflow with a full digital dashboard and multi-stage approval system.

Full-Stack Software Engineer

May 2025 - Feb 2026

CarGenie.co (AI Vehicle Recommendation Platform), Full-Time Contract

Toronto, ON (Hybrid)

- Sole engineer on the full platform build: architected a GPT-4o-powered recommendation engine with TypeScript, Node.js, and PostgreSQL, growing to 1,000+ registered users; quadrupled quiz-start engagement (20% to 80% of visitors) and drove a high downstream conversion rate through personalized multi-turn conversations.
- Built an admin dashboard with role-based auth, real-time analytics, and automated email campaigns via Mandrill and Mailchimp; owned technical roadmap execution alongside the founding team.

Research Assistant (Unity Developer)

Jun 2024 - Aug 2025

York University Sensorimotor Control Lab, Part-Time Contract

Toronto, ON (Hybrid)

- Built VR cognitive training applications used by 500+ research participants; co-designed calibration tooling with neuroscience researchers, cutting per-session setup time and reducing calibration errors across experiments.

Software Developer

Jan 2024 - Jan 2025

Ontario Government, Enterprise Architecture Office, Full-Time Internship

Toronto, ON

- Built a PyTorch document similarity model to flag duplicate project requests above a configurable threshold, triggering cross-team review workflows and improving resolution accuracy by 45%; developed Python AI automation pipelines for mental health support case routing.

Research Assistant (Software Developer)

Aug 2023 - Apr 2024

Lassonde School of Engineering, Dept. of Earth & Space Science, Part-Time Contract

Toronto, ON (Hybrid)

- Refactored and optimized a Python simulation codebase for 2D/3D Mars wind models; derived and implemented atmospheric equations, analyzed simulation data, and produced visualizations adopted in peer-reviewed research.

Projects

Classroom Agent System | *React, Node.js, Express, OpenAI Assistants API, Supabase, AWS*

2025

- Multi-agent pipeline for automated assignment grading and feedback; architected agent orchestration, REST API, Supabase auth, and Composio email automation on AWS Elastic Beanstalk. Cuts instructor grading time by 70%.

AI Wellness Companion (OPS Hackathon) | *Python, Azure OpenAI, PowerApps, Whisper*

2024

- Led a 13-person team to design and ship an AI wellness assistant with voice input and TTS over a one-month OPS innovation sprint; recognized for accessibility impact across Ontario Public Service employees.

Education

Honours Bachelor of Science in Computer Science

Dec 2025

York University, Lassonde School of Engineering

Toronto, ON

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, C, C++, C#, SQL, HTML5, CSS, PowerShell

AI / ML: Claude API, OpenAI API (GPT-4o, Assistants API), Azure OpenAI, PyTorch, machine learning, RAG pipelines, prompt engineering, human-in-the-loop systems

Frameworks & Libraries: React, Node.js, Express, Pandas, NumPy, Neo4j

Cloud & Platforms: Azure, AWS (Elastic Beanstalk), Vercel, Supabase, NeonDB, PostgreSQL, PowerApps

Product: Payments/Subscriptions, Real-Time Leaderboards & Analytics, Auth Systems

Developer Tools: Git, Linux/UNIX, Postman, Maven, JUnit, CI/CD, JIRA

Practices: System Design, Full-Stack Delivery, RESTful API Design, Agile/Scrum, SOLID Principles, Stakeholder Management
