Experience

Lead AI Software Developer

Feb 2026 – Present

Maxim Mechanical Group Inc., Contract

Bradford, ON (Hybrid)

- Leading architecture and development of a full-scale internal web platform with AI integrations for custom data analysis, organizational workflows, and day-to-day operations across job sites and office environments
- Shipped a complete health and safety platform module with AI integration - coordinating with 30+ end users across field and office to drive requirements, workflow state management, and human-in-the-loop AI interactions

Founder & Software Engineer

Dec 2025 – Present

VUNO Digital Solutions, Self-Employed

Toronto, ON

- Founded a software consulting sole proprietorship building custom websites, full-stack web apps, and internal business dashboards for admin tracking and operations - serving 3+ clients across multiple projects
- Deliver end-to-end solutions from design to deployment on time and within scope, leveraging LLMs and modern frontend frameworks to automate and streamline client workflows

Full-Stack Software Engineer

May 2025 – Feb 2026

CarGenie.co (AI Vehicle Recommendation Platform), Contract

Toronto, ON (Hybrid)

- Architected and deployed a GPT-4o-powered platform using TypeScript, Node.js, and PostgreSQL for personalized vehicle recommendations
- Built an admin dashboard with secure authentication, analytics, and automated email campaigns via Mandrill and Mailchimp

Research Assistant (Unity Developer)

Jun 2024 – Aug 2025

York University Sensorimotor Control Lab, Part-Time Contract

Toronto, ON (Remote)

- Built Unity-based VR cognitive training systems used by 500+ participants; refined calibration tools with interdisciplinary research teams

Software Developer

Jan 2024 – Jan 2025

Ontario Government, Enterprise Architecture Office, Internship

Toronto, ON

- Developed Python-based AI automation to streamline mental health support workflows and reduce manual processing
- Implemented SharePoint document similarity pipelines, improving resolution accuracy by 45%

Research Assistant (Software Developer)

Aug 2023 – Apr 2024

Lassonde School of Engineering, Dept. of Earth & Space Science, Part-Time

Toronto, ON (Remote)

- Engineered 2D/3D Mars wind simulations in Python, improving model accuracy by 20% and producing publication-ready visualizations

IT Technician

Jan 2023 – Apr 2023

Litens Automotive Partnership, Internship

Vaughan, ON

- Automated sysadmin tasks via PowerShell and cross-platform workflows, cutting resolution time by 50% and improving IT efficiency by 67%

Projects

Classroom Agent System | *React, Node.js, Express, OpenAI Assistants API, Supabase, AWS*

- Multi-agent system for automated assignment grading and feedback with RESTful APIs, Supabase auth, email automation via Composio, deployed to AWS Elastic Beanstalk

Mount & Mail (VR Multiplayer Game) | *Unity, C#, Fusion Networking, Meta Quest SDK*

- Shipped a multiplayer VR climbing and delivery game for Meta Quest with physics-based mechanics and synchronized multiplayer via Fusion Networking

AI Wellness Companion (OPS Hackathon) | *Python, Azure OpenAI, PowerApps, Whisper*

- Led a team of 13 developers to build an AI wellness assistant with Azure OpenAI and PowerApps, adding voice and TTS support to improve accessibility for OPS employees

Education

Honours Bachelor of Science in Computer Science

Toronto, ON

York University - Lassonde School of Engineering

Technical Skills

Languages: Python, Java, C, C++, C#, JavaScript, TypeScript, SQL, HTML5, CSS, PowerShell

Frameworks & Libraries: React, Node.js, Express, Spring Boot, OpenAI Assistants API, PyTorch, Pandas, NumPy, Neo4j

Cloud & Platforms: AWS (Elastic Beanstalk), Azure OpenAI, Supabase, PowerApps

Developer Tools: Git, Linux/UNIX, Postman, Maven, JUnit, CI/CD, JIRA, Unity, Fusion Networking, Meta Quest SDK

Software Practices: RESTful API Design, Full-Stack Development, AI Automation, Agile/Scrum, SOLID Principles, Design Patterns
